

FOODSERVICE DISTRIBUTORS

## HIGH-DENSITY RECLOSABLE BAGS

Handgards takes pride in leading the industry in high-quality, value-driven products for foodservice operations across the country. That's why Handgards is the first in the industry to offer High-Density, reclosable food storage bags.

Made of top-of-the-line material, and now 35% stronger than before, High-Density Reclosable Bags keep food fresher for significantly longer than traditional LD bags and offer added functionality. They can be used to keep food fresh on counters or protect from freezer burn during prolonged storage in freezers. These HD bags can also be used for cooking and steaming foods, either with boiling water or in microwaves (-50° F up to 200° F).

Simply seal in freshness with the secure closure and take it directly from the cold to the heat, all while preserving food quality and reducing the need to repackage or transfer foods.

**CAUTION:** For optimal results it is recommended that you follow your own procedure/process when testing food items.

**HIGH-DENSITY RECLOSABLE BAGS  
NOW 35% STRONGER!**

ZipGards High-Density Reclosables are now made from 35% thicker HDPE for stronger bags that protect against tearing and leaking.

Handgards offers multiple sizes for added storage capability and convenience, including the large High-Density 2 Gallon bag.

### FEATURES AND BENEFITS

- Freeze and heat without repackaging food (-50° F up to 200° F)
- 35% thicker HDPE material added for strength and durability
- Longer lasting freshness than traditional Low Density bags
- Write-on blocks for easy identification
- Freezing foods without the risk of freezer burn
- Perfect for cooking or steaming veggies and sides
- Preserves the quality and freshness of bread, cereal, nuts, granola and more

New, sharp, color-coded packaging re-design for easy identification
